

Soluteo Announces V4 Upgrade

December 14, 2004 - BlackBerry® based mobile technology specialist Soluteo is proud to announce the successful upgrade of all its solutions on BlackBerry Enterprise Server version 4.0.

According to director and V4 upgrade team manager Raphaël Steinman, the new operating system offers organizations more opportunities with an increase in data security and a simplified administrative interface. "V4 means faster response time for IT professionals in charge of wireless solutions because the operating system greatly simplifies the deployment of new terminals or customized software solutions" explains M. Steinman. "In the end updating to V4 is a good way to increase return on investment for existing software solutions".

As a member of the ISV BlackBerry Alliance program, Soluteo had a priority access to BlackBerry Enterprise Server version 4.0 that allowed its clients and partners to be the first to benefit from the V4 advantages. All customized solutions from Soluteo are available on V4 as of today.

About Soluteo...
