

New Generation of BlackBerry® Terminals Now Available at Soluteo

January 10, 2005 - BlackBerry® based mobile solutions specialist Soluteo announces that terminal series 7100, 7250 and 7290 are now fully compatible with its solutions. Soluteo's customized mobile extensions, including field force automation, real estate management, CRM and data acquisition are now offered on these new BlackBerry® models.

"The main advantage of these latest generation terminals is obviously their BlueTooth® capacity that makes possible the use of such peripherals as bar code scanner or global positioning system" explains Soluteo's Director, Sigisbert Ratier. He adds that BlueTooth® enabled BlackBerry® terminals increase interactivity by allowing the use of a wireless earphone or printers.

About Soluteo

Leader in the development of BlackBerry® based mobile solutions, Soluteo is one of the few ISV accredited enterprise in Europe by Reseach in Motion (Independent Solution Vendor). Based in the UK, in France and Canada, Soluteo specializes in real-time mobile extensions for existing enterprise software applications.
