Soluteo to sponsor “Connect With The Experts” technical seminar series

October 5, 2005 - Soluteo, a specialist in developing BlackBerry® based mobile solutions, is pleased to announce its commitment to sponsor the "Connect With The Experts" tour. The company will collaborate in the technical seminar series organized by Research In Motion at events in London on October 18, Paris on November 8 and Madrid on November 29 of this year.

“We intend to use these occasions to demonstrate to enterprises the potential extensibility of their IT infrastructure on the BlackBerry® platform, to help take them beyond basic terminal functionalities,” explains Soluteo Director Sigisbert Ratier. “Currently, the agenda, email and address book functions are very effective tools,” he adds. “But deploying customized software solutions can add value to a fleet of BlackBerry® terminals thus improving the return on investment.”

Soluteo, which exclusively develops BlackBerry® based applications, will showcase its expertise through recent case studies. The company will feature its Transport solution, which integrates Bluetooth and GPS technologies in the deployment of up to 450 terminals (http://www.soluteo.com/pdf/robert_cs.pdf). Its presentations will also discuss Soluteo’s CRM Mobile solutions, which permit client relationship management software to be extended to a BlackBerry® platform, and Mobile FFA, an effective custom solution in managing technical maintenance teams.

Enterprises wishing to benefit from a discount code of US\$50.00 on the purchase of a pass for the seminars in London, Paris or Madrid are invited to email their request to rsvp@soluteo.com.

About Soluteo

Based in the UK, France and Canada, Soluteo exclusively develops real-time mobile extensions for existing enterprise software applications based on BlackBerry® technology. Accredited by Research in Motion since 2002 as an ISV (Independent Solution Vendor), Soluteo is well known for its expertise in large-scale deployment of terminals (20 to 400-plus). The company mainly serves clients in the transport, telecommunications, real estate and energy industries.
